

**D**esign Aid are marketing and design specialists, with a dedicated team providing professional creative solutions across all media.

We are selective group of companies working together and focusing on the work that has to be done. We work as an extension of your team, working with you as well as for you, giving you creative choice and reassurance that pre-press, artworking and production, repro and print costs are kept to a bare minimum. Delivering the finished product with peace at mind.

It's about creating designs that don't just look good, but work hard for your business. A solid understanding of your marketing objectives allows us to be creative, disciplined, focused and yet totally out of the box.

Our aim is to ultimately establish a pro-active working relationship with clients which are always enjoyable, and where the unique results you want are always achieved. After all we treat each account as if it is our only account.

We like to “get it right going in, get it right coming out!”
